

4 Steps to Import with FedEx

Step 1 Notified by Overseas Shippers

Step 2 Check Duties and Taxes

Step 3 Track Your Shipment

Step 4 Receive Shipment

4 Steps to Import with FedEx

As an experienced international importer, FedEx helps you to prevent costly customs delays for your shipments.

Step 1 : Notified by Overseas Shippers

- An overseas shipper places an order and sends a shipment to you.
- The shipper can notify you of the International Air Waybill numbers and product details by using FedEx Ship Manager® at [fedex.com](https://www.fedex.com), **Ship Alert**®, or online tracking notification function.
- If the freight charges are billed to you as a recipient our integrated billing system allows you to pay by using **one** account number.

Step 2 : Check Duties & Taxes

- The amount of duties and taxes will depend on the type of commodity, product value, country of manufacture, and application of product.
- Details can be found on our website at <https://www.fedex.com/GTM>. Then click on "**Estimate Duties and Taxes**". Although signing up is required to access, the service is free of charge for multiple queries with no limitations.

Step 3 : Track Your Shipment

- You can track your shipment status and get automated tracking updates (exception & delivery notification) by using our online tracking system that offers a selection of 16 different languages.
- You can email the tracking details to the shipper and 3 other parties.

Step 4 : Receive Shipment

- FedEx provides fast and smooth clearance to your shipments.
- FedEx also provides pre-clearance prior to shipments' arrival to expedite the customs release process so that you will receive your shipments earlier.
