# FedEx International Priority® - Europe

Export Tariffs applicable in Czech Republic as from 5 January 2009

## How to use this tariff

- Determine the **zone** of the destination and the **weight** of your shipment to find the rate in the appropriate column.
- To calculate rates for shipments from 10 kg up to 70 kg, take the appropriate base rate (10 kg, 21 kg or 45 kg) and add the rate for each additional 0.5 kg.
- For shipments above 70 kg simply multiply the quoted rate per kg by the total shipment weight.

For example, a 13.5 kg shipment would use the rate for 10 kg, plus seven times the rate for an additional 0.5 kg.
