

Packing Requirements for Express Freight Shipments Effective May 1, 2011

To lessen the possibility of damage or delay to your freight, FedEx Express requests the following:

- Band all single-piece cargo shipments greater than 150 lbs. on all sides with heavy-duty metal or break-resistant banding. This includes crates and skidded cargo.
- If your freight (with any single piece greater than 150 lbs.) is contained within a hardened container (plywood, metal) and is not banded, an exterior lock or clamp must be used (glue, nails and screws are not sufficient).

Freight not received as detailed above may be opened and inspected prior to loading on aircraft, resulting in increased potential for delays or damage. Your assistance in banding or placing an exterior lock or clamp on hardened containers upon tendering to FedEx is greatly appreciated.

These requirements apply to FedEx 1Day[®] Freight, FedEx 2Day[®] Freight, FedEx 3Day[®] Freight, FedEx International Priority[®] Freight, FedEx International Economy[®] Freight, FedEx International Premium[®], FedEx International Express Freight[®] and FedEx International Airport-to-AirportSM.

Thank you in advance for your assistance and business.
