

Communicate worldwide without leaving town.

Enhance communication

- Enjoy face-to-face interaction with remote field personnel.
- Express your ideas clearly with slides and visual aides.
- Present graphs and other documents right from your laptop.
- Videotape your conference for future viewing.

Now you can organize face-to-face meetings with anyone around the world and eliminate travel time and expenses. Available in 122 FedEx Kinko's Office and Print Centers, our videoconferencing services enable you to conduct effective meetings, make presentations to clients and meet new business prospects in distant cities without traveling.

Our videoconferencing suites feature easy-to-operate equipment, a special camera to present charts and graphics, and voice-activated cameras that track all action. Present directly from your laptop.

Or, if you already have your own videoconferencing equipment, you can extend your network with direct links to our videoconferencing sites — without incremental equipment costs.

A cost-effective way to conduct meetings

With videoconferencing, one-hour meetings last one hour because there's no travel time to worry about — you'll always be on time and everyone can attend.

- Increase productivity and reduce costs.
- Hold effective face-to-face meetings.
- Conduct several meetings in one day.
- Add sites to your videoconferencing network.

You can check room availability 24 hours a day, 7 days a week. Plus, we offer automated invoicing so you don't have to wait in line to pay your bill.

For more information and a videoconferencing location close to you, go to fedexkinkos.com, or call 1.866.828.4563.
