How to Determine Your Intra-Canada Rates

Our rates are based on the total weight of all packages shipped on a single air waybill. To determine the door-to-door rate for your intra-Canada shipment, follow these simple steps:

Step 1: Choose your FedEx shipping solution.

Your Shipping Need	Our Solution
10 a.m. next business day to most metropolitan areas	FedEx First Overnight®
Morning, next business day to most metropolitan areas	FedEx Priority Overnight®
5 p.m. next business day to businesses and by 8 p.m. to residences in most metropolitan areas	FedEx Standard Overnight™
1 to 2 business days by 5 p.m. to businesses and by 8 p.m. to residences in most metropolitan areas	FedEx 2Day®
1 to 3 business days by 5 p.m. to businesses and by 8 p.m. to residences in most metropolitan areas	FedEx Economy®
5 p.m. next business day to most locations	FedEx 1Day® Freight

Step 2: Locate your origin and destination zone using the Postal Code Zone Index on the next page.

Step 3: Find the origin zone in the vertical list and the destination zone in the horizontal list using the Intra-Canada Zone Index on page 6. The number listed in the intersection is your zone.

Step 4: Determine your shipment weight and find the rate in the appropriate zone on the corresponding Rate Chart (see pages 7 to 28).

Step 5: Add special handling fees, surcharges and other additional charges, if applicable. See pages 112 to 121 for a list of these fees and charges.

* Some restrictions apply. See the Terms and Conditions in the FedEx Service Guide at fedex.ca for details.

Dimensional Weight To determine whether the dimensional weight applies, multiply the length by width by height of each package. Dimensional weight for intra-Canada and international packages is calculated by multiplying the length by width by height of each package in inches and dividing by 139 cubic inches per pound (if multiplied in centimetres, divide by 5,000 cubic centimetres per kilogram). If the dimensional weight exceeds the actual weight, charges may be assessed based on the dimensional weight. FedEx reserves the right to modify or amend the Dimensional Weight standard without notice. Please note that the dimensional weight for FedEx® International Deferred Freight service is calculated by multiplying the length by width by height of each package in inches and dividing by 166 cubic inches per pound (if multiplied in centimetres, divide by 6,000 cubic centimetres per kilogram). Any fraction of a measurement is rounded up to the next-higher whole number.	Intra-Canada Package Services International Package Services Intra-Canada Freight Service International Freight Services
